

Forage and Feed Test Results

Data of the customer

Name of company: Karol Dairy Consulting Sro

Postal address of the test results: Parkové nábrezie 5, Nitra 94901, Slovakia

E-mail address of the test results: juraj@karoldairy.sk

Data of the sample

Date sampling: 13.06.2017

Type of forage: Lucerne silage

Ordered package: Profi package

Name of the person who sampled:

RESULTS	Result	Comment	
		Average value	Deviation from optimum
Nutrient content and calculated Hungarian data (Hungarian Feed Codex)			
Dry matter	g/kg	333	352
Crude protein	g/kg DM	235!	195
Crude fat	g/kg DM	29	29
Crude fibre	g/kg DM	214	279
Crude ash	g/kg DM	113	128
Sugar	g/kg DM	12	23
Starch	g/kg DM		
NDF	g/kg DM	341	422
ADF	g/kg DM	267	322
ADL	g/kg DM	45	61
Hemicellulose	g/kg DM	74	100
Cellulose	g/kg DM	222	260
NFC	g/kg DM	282	226
NSC	g/kg DM		
NFC/NDF		0,83	
MFE (H.F. Codex)	g/kg DM	81	
MFN (H.F.Codex)	g/kg DM	138	
UDP (H.F. Codex)	g/kg DM	54	
FOM (H.F.Codex)	g/kg DM	459	
DE (H.F. Codex)	MJ/kg DM	11,6	
NEm (H.F.Codex)	MJ/kg DM	5,86	
NEg (H.F. Codex)	MJ/kg DM	3,42	
NEI (H.F. Codex)	MJ/kg DM	5,95	Good
Hungarian calculated data based on CSPS

kd Protein	%/hour						
kd Starch	%/hour						
kdNDF	%/hour						
Sensory evaluation (MSZ 6830-1:1983)							
Colour		Greenish-brown.					
Odour		Typical.					
Touching		Wet.					
Structure		Homogenous, chop-size range: 1-4 cm.					
Quantity of grain							
Contamination		Weed seeds, weed and other contamination were not found in the sample.					
Quality based on nutrient content (Hungarian Feed Codex)							
Wilted lucerne silage in good quality.							
Quality of fermentation, animal health risk							
Fermentation profile is on excellent level, there is no animal health risk!							
<i>The average based on results of samples received by the Livestock Performance Testing Ltd since 2013 and may be out of the optimal range.</i>							

Methods	(list of wet-chemical analytical and <i>in vitro</i> methods provides data for NIR reference database)		
Sample preparation	MSZ ISO 6498: 2001	In vitro methods	
Sensory evaluation	MSZ 6830-1:1983,	OMd	Tilley J.M.A., R.A. Terry, 1963
Moisture content	MSZ ISO 6496:1993		Incubating forage in rumen fluid for 48 hours
Crude ash	MSZ ISO 5984:1992, NEN 3329,	By-pass starch	Incubating forage in rumen fluid for 48 hours
Crude protein	NEN-ISO 5983-2	NDFd	Incubating forage in rumen fluid for 48 hours
Crude fibre	NEN-EN-ISO 6865	Physical structure	
Crude fat	NEN-ISO 6492	CPSPS	Ferreira and Mertens, 1997
Sugar	NEN 3571	peNDF	Mertens, 1988
Starch	NEN-EN-ISO 15914	Minerals and traces	In collaboration with other Feed Labs
NDF, ADF, ADL	NEN-EN-ISO 13906, Van Soest, 1963	DCAD	Meq [(Na+K)-(Cl+S)]
Soluble crude protein	NEN-ISO 5983-2		
NIR spectra	NEN-EN-ISO 12099		

Description of the test: spectrum of the dried and ground samples (MSZ ISO 6498:2001) are complied with BLGG AgroXpertus calibration reference database.
 Analytical results are valid to the samples received by the Lab. The customer is responsible for keeping the rules of sampling.

The reported results only refer to the material supplied to AT Kft. NIR Feed Lab.

Használt rövidítések

NFC	Non fiber carbohydrates	PDIN	Nitrogen-dependent digestible protein
NSC	Non structural carbohydrates	PDIE	Energy-dependent digestible protein
MFE	Energy-dependent metabolizable protein	By-pass starch	Rumen undegradable starch
MFN	Nitrogen-dependent metabolizable protein	Dig.OM%	Digestibility of organic matter
UDP	Undegradable protein	VOS	Digestible organic matter
FOS	Fermentable organic matter (rumen)	NDFd	NDF rumen degradability
DE	Digestible energy	uNDF	Non degradable NDF
NEm	Net energy for maintenance	RFV	Relative feed value
NEG	Net energy for gain	UFL	Feed unit for maintenance and milk production
NEI	Net energy for lactation	VEM	Feed unit milk
ME	Metabolizable energy	VEVI	Feed unit beef cattle intensive
CSPS	Corn silage processing score	DCAD-érték	Cation-anion difference
Digestible	Digestible starch (total digestive system)	kd OM	Degradation rate of organic matters in the rumen
NEL-VC	NEI based on measured digestibility	kd Protein	Degradation rate of crude protein in the rumen
nXP	Available crude protein in the duodenum	kd Starch	Degradation rate of starch in the rumen
RNB	Ruminal nitrogen balance	kd NDF	Degradation rate of NDF in the rumen
RDP	Degradeable crude protein		
PDIA	Digestible true protein		

Comment:

- **Dry matter content** of the silage is good for an intensive lactic acid fermentation.
- **Fermentation quality:** pH of the sample is excellent, **LA/AA ration** is on excellent level as well, because of the excellent *lactic acid content!*
- **Crude protein** content of the sample is on excellent level, **crude fibre- NDF-, ADF- and ADL-content** confirm good quality according to the Hungarian database.
- The sample can be categorized as a **good quality wilted lucerne silage** according to the Hungarian Feed Codex **based on fibre composition of the sample.**
- **Net energy content** of the sample (calculated according to the Hungarian Feed Codex) confirms good quality according to the Hungarian database.

Gödöllő, 20/06/2017

Dr. Szilvia Orosz
 Director of Feed Laboratory
